W00A01.12 MAJOR INFORMATION TECHNOLOGY DEVELOPMENT PROJECTS

PROGRAM DESCRIPTION

This Program provides funding for the Race Based Traffic Stops Data Collection System Major Information Technology Development Project within the Department of State Police (DSP). As required by legislative mandate, <u>Transportation Article</u> 25-113, the Department of State Police will collect data for all eligible traffic stops that meet the established criteria. Established as Phase II of the project, the Department automated the data collection process by providing an electronic method of capturing the source data and digitally transmitting the source data to a centralized web server used for data storage, analysis and reporting purposes pursuant to the requirements of the statute. The wireless transfer of race-based traffic stop information will also maximize our personnel resources by allowing our troopers to remain out on patrol instead of having them come to local barracks to download the required information. In this terrorist target-rich environment of Maryland, as an additional feature of the wireless connection, each field trooper will ultimately have the ability to conduct and receive real-time information regarding wanted/stolen queries of Statewide and National databases, as well as Motor Vehicle informational inquiries.

The DSP periodically retrieves and analyzes traffic stop data for the purpose of identifying training issues and the existence of indicators associated with discriminatory practices. To accomplish this objective, the Department works in conjunction with the Maryland Police and Correctional Training Commissions (MPCTC) and Maryland Justice Analysis Center (MJAC) to establish statistical benchmarks that may highlight potential problem areas.

This Department shall continue to work closely with MPCTC and MJAC throughout the lifecycle of this project. Also, the Department will continue to coordinate its traffic stop data automation with the Department of Budget and Management Office of Information Technology.

MISSION

The mission of the Race Based Traffic Stops Data Collection System Major Information Technology Development Project is to automate the data collection process by providing an electronic method of capturing source data and digitally transmitting the source data to a centralized web server used for data storage, analysis and reporting purposes pursuant to Article 25-113 of the <u>Transportation Article</u>.

Goal 1. To provide an efficient and effective electronic means of capturing and transmitting Race Based Traffic Stop Data.

Objective 1.1 By the end of calendar year 2004, provide all uniform patrol personnel with an automated data collection device and system to electronically capture and transmit traffic stop source data.

W00A02.01 FIRE PREVENTION SERVICES - FIRE PREVENTION COMMISSION AND FIRE MARSHAL

PROGRAM DESCRIPTION

The Fire Prevention Commission and Fire Marshal operate in conformity with Title 6 of the Public Safety Article and are charged with the responsibility of safeguarding life and property from hazards of fire and explosion. The Agency evaluates buildings and facilities to determine compliance with statutes and regulations relating to fire safety and to approve fire safety features for other State licensing agencies. The Agency investigates suspicious fires and explosions and arrests perpetrators. It operates a bomb squad and records fire losses as reported by insurance companies and fire departments. It also develops fire prevention education programs and has certain safety functions as well as control responsibility for sales of certain fire protection devices and hazardous materials.

MISSION

The mission of the Office of the State Fire Marshal is the protection of life and property from fire and explosion through the efforts of a diverse, highly trained and dedicated staff in partnership with other public safety agencies and the community. This is accomplished through aggressive criminal investigation of fire and explosive incidents, quality fire protection engineering services, enforcement of the State Fire Prevention Code, data collection and analysis and public fire safety education.

VISION

The State Fire Marshal is committed to developing programs and providing services that will enhance the quality of life and provide for safer communities within Maryland.
